8/10/26 8. Configuration and Security Setup of a Wireless LAN using Cisco Packet Tracer

- AIM: To configure a Wireless LAN using a Lin keys wireless router in Cisco Packet Tracer and securely connect three PCs using a WEP security key
- OBSERVATION:
- A linksys Wireless Router was connected to three PCs to form a Wireless LAN
- The router IP address was configured as 192.168.0.1
- The SSID of the wireless network was configured as Mother network
- WEP security was enabled on the wireless router with the security key
- Static IP addresses were assigned to the three PCs:

  PC0 : 192.168.0.2

  PC1 : 192.168.0.3

  PC2 : 192.168.0.4
- The subnet Mask was set to 255.255.255.0 for all PCs
- The Default gateway was set to 192.168.0.1 for all PCs
- All three PCs were connected to the Mother Network using the configured WEP key
- The wireless connection was successfully established between the PCs and the router

RESULT: Thus, the Wireless LAN was successfully configured using a Linksys Wireless Router in Cisco Packet Tracer, and all three PCs were connected securely to the wireless network
